- And user enter the password, if its match the user will login to the portel

2. Password Reset

- **Forgot Password option**
- Reset options:
    1. **Email link** → system sends reset link. / **OTP** → system sends OTP to email

After Login Functionality

On the dashboard, there should be three main sections:

1. Referral Functionality
2. Events Dashboard
3. Messages from Leadership

Additionally, the header should display:

- Global NRI Leadership
- Local Leadership

Referral Functionality

- The system should provide an option to **generate a referral link** with a **copy link** feature.
- Each time a user generates a link, a **new unique referral link** should be created.
- When the user shares this link, others can register using it.
- **Active Referrals** → Increase based on the number of users who directly register using the original link.
- **Passive Referrals** → Count users who register through links generated by members who themselves registered using your referral link.

Events Module:

The **Events Module** allows admins to post event details with images, which are displayed to users after registration/login.

User Module:

The **Leadership Module** delivers messages and updates from global and local leaders directly to registered users.

NRI community: The **Header** will display a list of countries, and upon selecting a country, the system will fetch and show the list of designated officers/leaders directly from the database.

Local Leaders: The **Header** will also provide a list of local regions (state/district), and upon selection, the system will fetch and display the respective local leaders directly from the database.
